eCast Software™ to Launch Dr 2 Dr Hybrid EMR at the “Integrated Community EHR Educational Pavilion” during the 2009 MGMA conference in Denver, Oct 10 -12.

eCast Software™, in partnership with MaxMd, will launch its Dr-2-Dr Hybrid EMR™ at the MGMA Annual Conference held in Denver. Dr-2-Dr Hybrid EMR™ is the first and only EMR to integrate .mdEmail® secure email technology within an EMR. Dr-2-Dr Hybrid EMR™ allows providers the ability to e-Prescribe, manage patient documents, and communicate those documents through a HIPAA compliant, encrypted email system using the .mdEMail® technology.

eCast Software™ is participating in the “Integrated Community EHR Educational Pavilion.” Sponsored by a contingent of 15 Healthcare IT vendors, the “Integrated Community EHR (ICE) educational pavilion will demonstrate how patient data can be shared between multi providers in different practices with different practice management and EHR applications. Designed to illustrate how Patient Care Coordination can be enhance by combining a Health Information Exchange (HIE) and multi EHR applications within the same community.

For additional information, Contact: Michelle Harper, Sales Manager, 919.334.6348

The eCast Dr-2-Dr technology is an entry-level “hybrid” EMR system that allows doctors to achieve immediate functionality without total immersion in the EMR. The system is expandable when the doctor is ready to a fully-compliant, CCHIT-certified EMR including hundreds of specialty-specific templates. Dr-2-Dr Hybrid EMR™ comes complete with patient registration, scheduling, ePrescribing, Allergies, and unlimited attachments that can be sent using secure, encrypted .mdEmail® technology to any provider or hospital with a simple email interface.

About eCast Corporation

For over 10 years, eCast Corporation has been providing medical software solutions and cutting-edge technology to medical practices.
